Oct. 17, 2016, Taira Oogi

- [1] Black hole clustering and duty cycle in the Illustris simulation
C. DeGraf, D. Sijacki; arXiv:1609.06727
- [2] The dark nemesis of galaxy formation: why hot haloes trigger
black hole growth and bring star formation to the end
Richard G. Bower, Joop Schaye, Carlos S. Frenk et al.;
arXiv:1607.07445
- [3] Satellite quenching timescales in clusters from projected phase
space measurements matched to simulated orbits
Kyle A. Oman, Michael J. Hudson; arXiv:1607.07934
